

Beginner's Guide to Accessibility

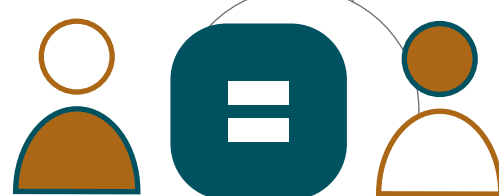

Understanding Accessibility

The inclusive practice of making content, electronic or print, usable by people of **all abilities and disabilities**

It matters

Everyone, regardless of disability, should enjoy **equal access** to information, interaction, education and employment

Be Aware of Challenges

Challenges may also include activity limitations and participation restriction

Visual Impairments

Hearing Impairments

Speech Impairments

Cognitive Limitations

Literacy Level

Mental Health

Aging Population

Limited Movement

Limited Internet Access

Know your Principles and Guidelines

Access to functions using keyboard

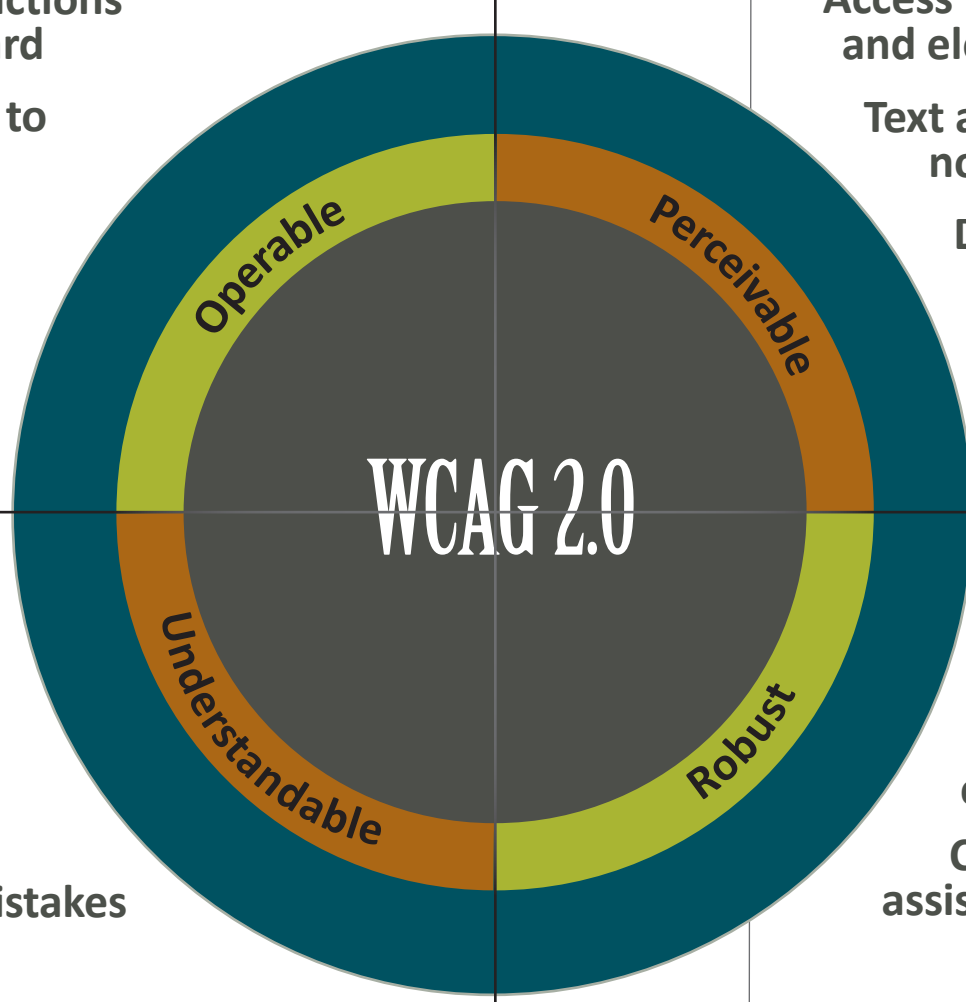

Enough time to read content

Navigable content

Readable content

Predictable content

Assistance in correcting mistakes

Access to audio-visual and electronic media

Text alternatives for non text content

Distinguishable background/foreground

Adaptable content

Avoid design causing seizures

Compatible with assistive technology

In order to be compliant, CSPS must minimally adhere to Level A and Level AA of the WCAG 2.0 success criteria.

Top 5 Tips to Improve Accessibility

H1 _____ H2 _____ H3 _____	Organize your content with headers
	Write your content using plain language
	Give links unique and meaningful descriptions
	Use strong color contrast for text or emphasis
"alt"	Include proper alternative text for images
